Education

University of Southern California

Master of Science in Computer Science

- Coursework: Algorithms, Database Systems, Deep Learning, Game Development

Los Angeles, CA

January 2026–May 2027

University of Southern California

Bachelor of Science in Computer Science & Games

Los Angeles, CA

August 2023–May 2027

Skills

Programming: C++, C#, Python, Javascript, Java, HTML, CSS

Technical: Unreal Engine, Unity, Perforce, Diversion, Git, Docker, Confluence

Tools: TensorFlow, PyTorch, Scikit-Learn, React.js, Node.js, Flask, PostgreSQL

Work Experience

USC School of Cinematic Arts

Operations

Los Angeles, CA

January 2026–Present

- Execute facility opening and closing procedures, ensuring operational readiness for daily business hours
- Operate autonomously during high-volume shifts, handling administrative duties and facility needs
- Resolve high-volume inquiries and requests from students, faculty, and visitors in a timely manner

Students of Service (SOS)

San Antonio, TX (Remote)

Developer

May 2025–August 2025

- Collaborated with a multidisciplinary team of 8 to redesign and overhaul organization's website, enhancing usability and modernizing its design
- Performed a comprehensive audit of existing website and contributed to design and implementation of updated navigation and responsive page layouts to enhance engagement and improve user retention
- Coordinated with nonprofit leadership to translate organization needs into technical solutions

Virginia Partnership for Out-of-School Time

Harrisonburg, VA (Remote)

Data Management Intern

May 2024–August 2024

- Developed two automated scripts to clean and organize over 1,000 data points, resulting in improved data quality and streamlined workflows tailored to organizational needs
- Authored a comprehensive 15-page documentation covering code functionality and work processes to facilitate future use and maintenance

Academic Projects

Flay

Los Angeles, CA

Designer and Programmer

August 2026–Present

- *[Describe Flay: one line on what it does and your role/tech]*

Line By Line

Los Angeles, CA

QA Lead

August 2026–Present

- Built a centralized bug-tracking database in Jira to log, categorize, and prioritize issues across the team
- Established a QA pipeline in collaboration with engineering to report, triage, and resolve bugs and verify fixes
- Led the QA team in rigorously stress-testing weekly builds to expose and document as many problems as possible

Parrying God

Los Angeles, CA

Designer and Programmer

January 2025–May 2025

- Developed a 3rd-person multiplayer fighting game in Unity, managing full development lifecycle from initial prototype to a polished release candidate
- Engineered a dynamic state-machine-driven combo system, integrating light, heavy, dash, and special attacks into unique branching attack chains for multiple weapon types
- Implemented a momentum-based transformation system rewarding combat proficiency with gameplay-altering "god forms," complete with new visuals and impactful combos
- Architected scalable backend systems for weapons and transformations, facilitating rapid content expansion and prototyping
- Created a dynamic HUD providing real-time feedback on available combos based on player inputs
- Synchronized player combat states and physics for multiplayer using Mirror and utilized Steamworks for matchmaking
- Iterated on gameplay mechanics through weekly playtest feedback, fine-tuning parry timing windows and hit registration
